This Agreement governs your use of any online or mobile banking services maintained by Bank and accessible through www.mvbnnow.com a personal computer or a mobile device, including a smartphone, tablet, or any other eligible handheld or wearable communication device (the "Service(s)"). The Bank's Services include access to both Business and Personal Online Banking and Mobile Banking services.

Under the terms of this Agreement, you may use the Services to obtain financial products and services, access, and view account information, and, for certain accounts, move money electronically and perform authorized transactions.

When you first set up your Online/Mobile ID, we will link all of your eligible Bank and affiliate accounts, including joint accounts. If you open an additional eligible account at a later date, we will link your new account to the Service, unless you tell us not to do so. When your Service is linked to one or more joint accounts, we may act on the verbal, written or electronic instructions of any authorized signer.

Please note that some of the Services may not be available when using certain digital devices or applications. For example, some functions may be available online through a personal computer but not available through our mobile app.

B. Accepting the Agreement

When you apply for, enroll in, activate, download or use any of the Services described in this Agreement or authorize others to do so on your behalf, you are contracting for all Services described in the Agreement and agree to be bound by the terms and conditions of the entire Agreement, as well as any terms and instructions that appear on a screen when enrolling in, activating or accessing the Services.

The terms and

conditions for those account agreements, including any applicable fees, transaction limitations, liability rules and other restrictions that might impact your use of an account with the Services, are incorporated into this Agreement. Additional Authentication - We may require/add additional authentication tools and/or services to your account login process. The authentication tool may require use of your electronic device or request for personal identifying data to confirm your identity. This extra layer of security for your Online Banking Account helps ensure that you're the only person who can access your account.

Encryption - The Service uses the Secure Socket Layer (SSL) encryption technology for everything you do while using Online Banking. Your browser automatically activates this technology when it attempts to connect to our Service. The Service requires a browser that supports 128-bit encryption. The Service will warn you if your browser does not meet this requirement.

Whenever SSL is securing your communications, the browser will typically indicate this *secure session* by changing the appearance of a small icon of a padlock at the bottom of the screen from "open" to "locked". What this means is your communications are scrambled from your browser to our servers at all times so no unauthorized party can read the information as it is carried over the Internet.

Certificate Authority - The servers hosting the Service have been certified by a Certificate Authority to assure you that you are actually talking to the Service instead of someone pretending to be us. If you are using an older browser, you will see that the Certificate Authorities key may have expired; you will need to update your browser. Business users, instructions for upgrading your browser are located on the Browser SSL Update link, which is located on the Service login page. By clicking on the lock within the Service, you can view the certificate to ensure it is valid.

Cookies - During your use of the Service, our Online Banking Service Provider will pass an encrypted *cookie* to your electronic device(s) in order to identify your electronic device(s) during the session. This cookie enables us to process multiple transactions during the session without having to provide a Username and Password for each individual transaction. Users must accept this cookie to use the Service. This cookie does not contain any personal information; it simply provides another level of security for our Online Banking product. The cookie is stored on your electronic device(s) hard drive, identifying your electronic device(s) while you are logged on. When you log off, close your browser, or turn off your machine, the cookie will be deleted. A new cookie is used for each session; thus, no one can use the prior cookie to access your account.

Operational Controls - You may want to consider utilizing:

- i. Dual control to initiate ACH and wire transfers;
- ii. Automatic wire, ACH, and online alerts, to include event alerts, balance alerts, item alerts, and personal alerts;
- iii. Online access to reconcile all banking transaction daily;
- iv. Audits to ensure that security measures are implemented properly and effectively; and
- v. Education to controllers about security measures and the dangers of user access

Physical Controls - You should ensure that security measures are in place to protect your computer systems and sensitive information from tampering and theft. Only authorized personnel should have access to sensitive areas in which network or server devices are kept. If a security token or any physical security device used to access your Online Banking Accounts are lost or stolen, you should immediately report it to the Bank.

Additional Security Guidelines:

- All Authorized Users should sign-off after every Service session; however, online sessions will automatically end after fifteen (15) minutes of inactivity. This to protect you in case you accidentally leave your electronic device(s) unattended after you log-in.
- The security of public electronic device(s) (e.g., in a library, or Internet café) cannot be assured; therefore, we recommend that you refrain from accessing the Service on a public electronic device(s).
- Routinely scan your electronic device(s) servers, and electronic media using a reliable virus detection product. Undetected or un-repaired viruses may corrupt and destroy your programs, files, and even your hardware. Additionally, you may unintentionally transmit a virus to other electronic device(s).
- Use a firewall product (hardware and/or software), especially if you have a broadband Internet connection such

as DSL or cable modem.

- Periodically update your electronic device(s) operating system and browser for critical security related patches.
 - We recommend use of the most current, fully patched, versions of Internet browsers for accessing the Service.
